

Securing client cloud environments using VMware NSX capabilities

Łukasz Walicki

DataCenter PPNT

Very short agenda

- DataCenter PPNT - who we are, what we do?
- From hardware to network virtualization
- Virtual (cloud) environments - is it really secure?

Safety, Professionalism, Modernity

- Safe/Secure DataCenter

High availability policy, ISO 20000 i 27001

- Qualified and Professional Team

Experienced, certified specialists

- Modern Business

Gold Partner Microsoft, partner VMWare, Veeam

Our Services

- **Virtual Datacenter, Virtual servers**

Modern cloud solution based on vCloud VMWare

- **Collocation**

Quality and safety for your physical servers

- **Client systems administration**

Professional Services and Support

Physical or Virtual servers

Is it secure way?

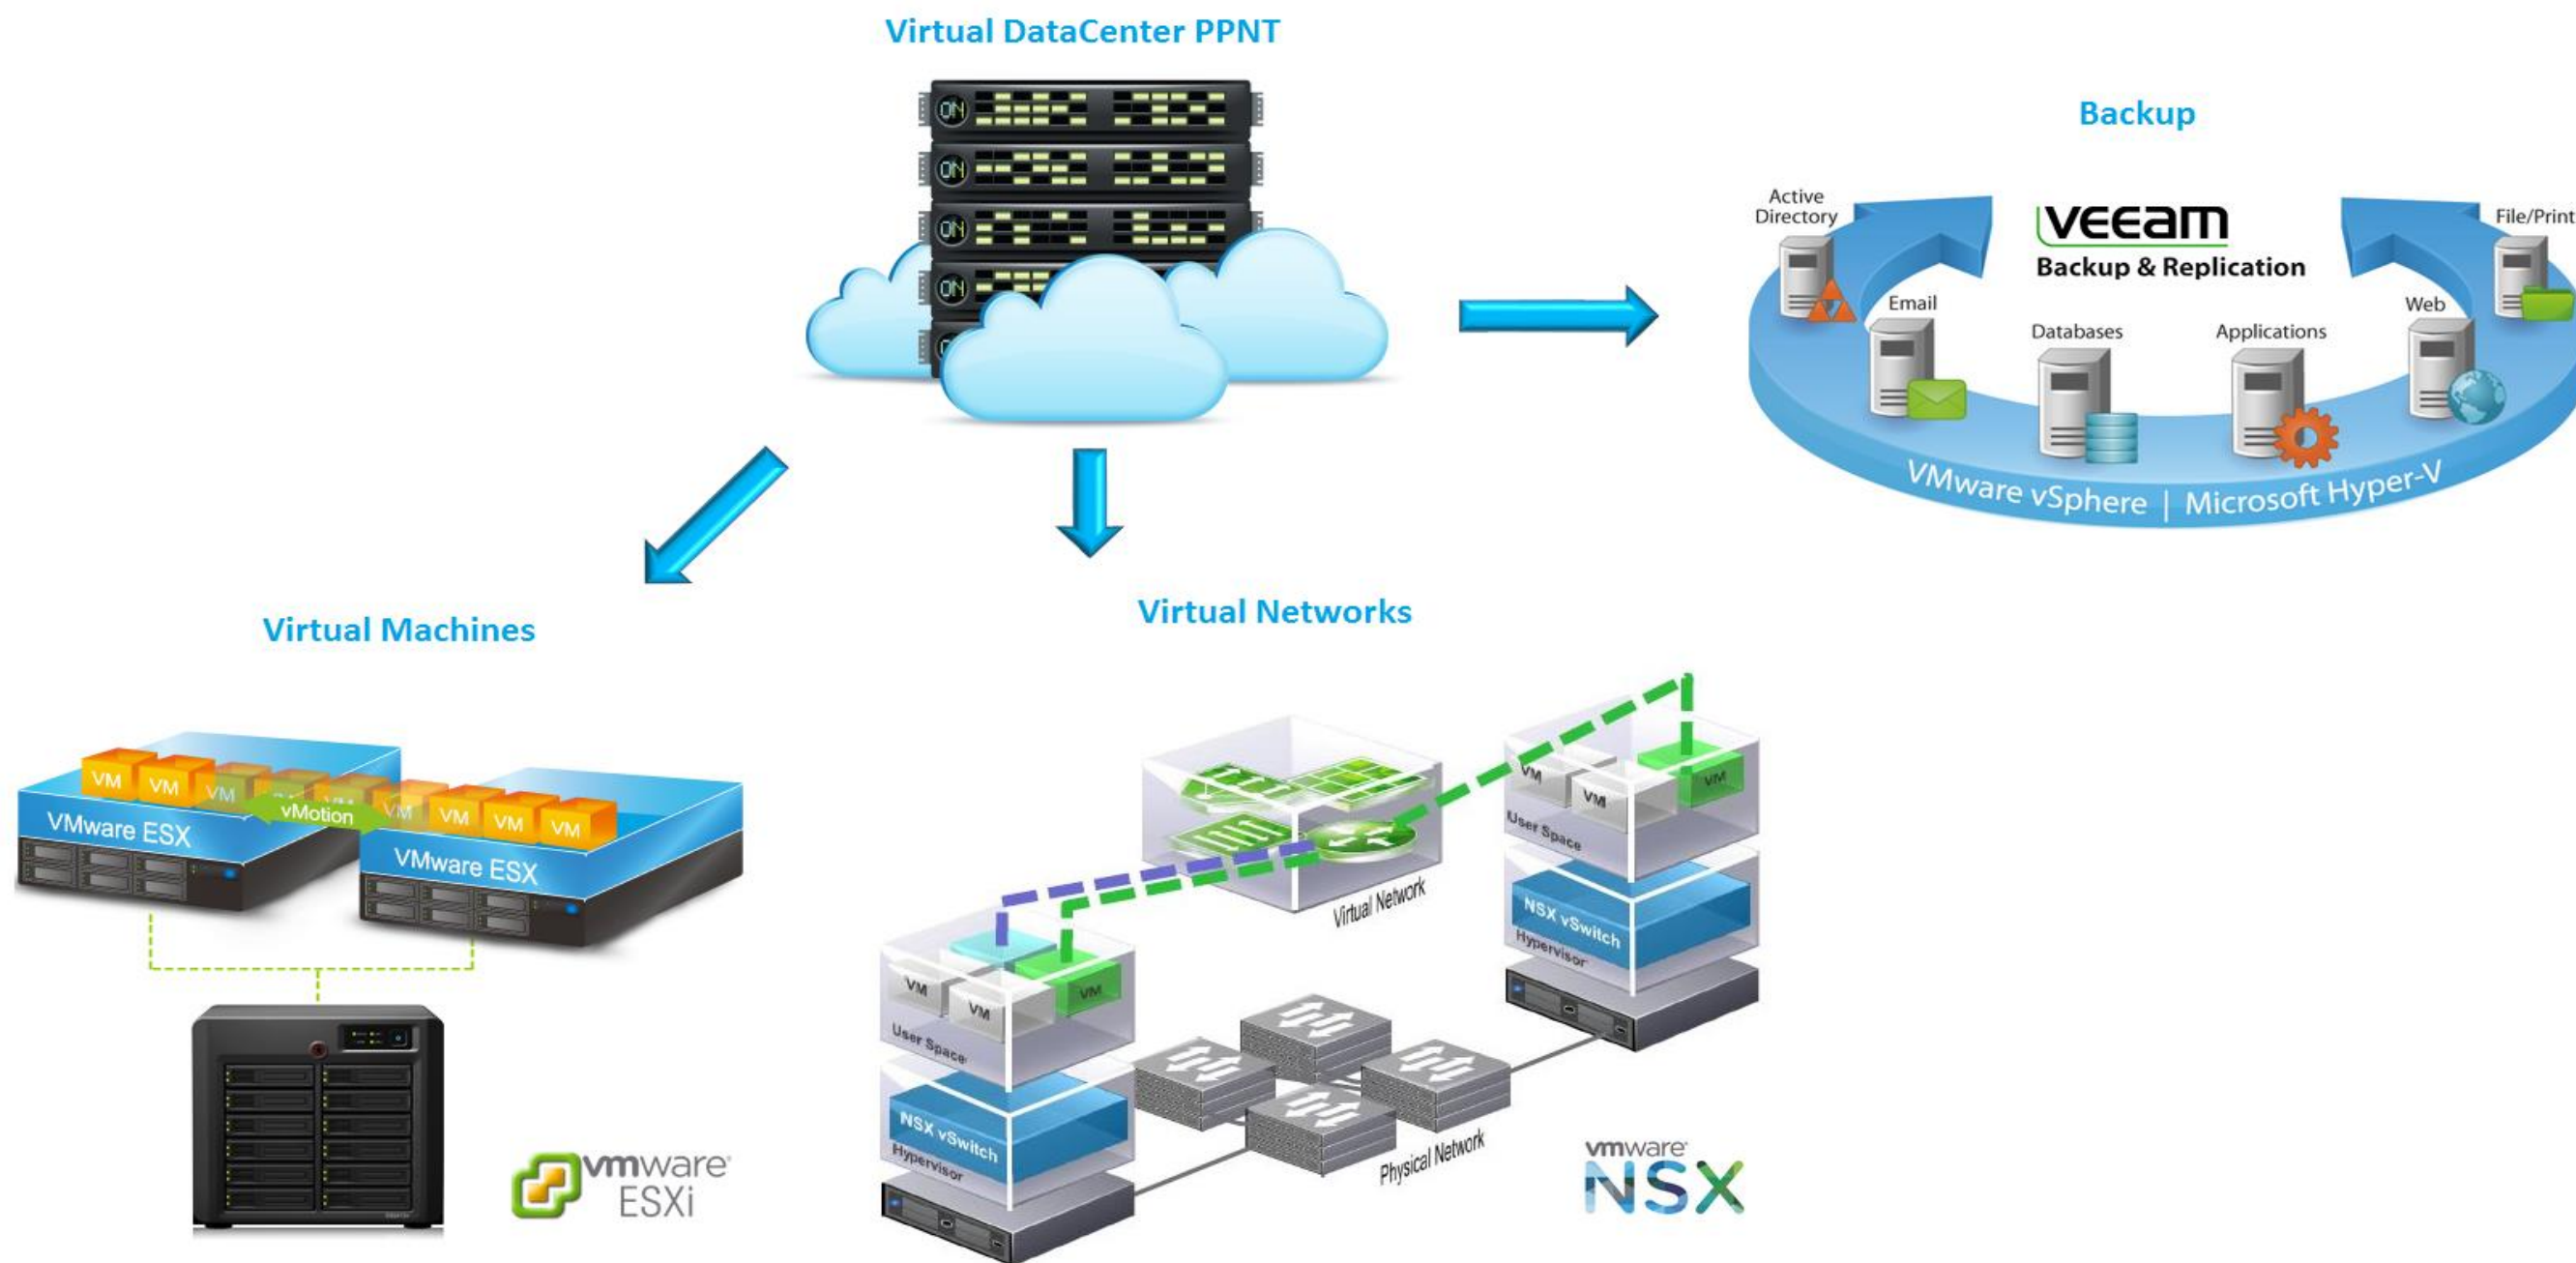

Network virtualization - why?

Network virtualization - next step for cloud services

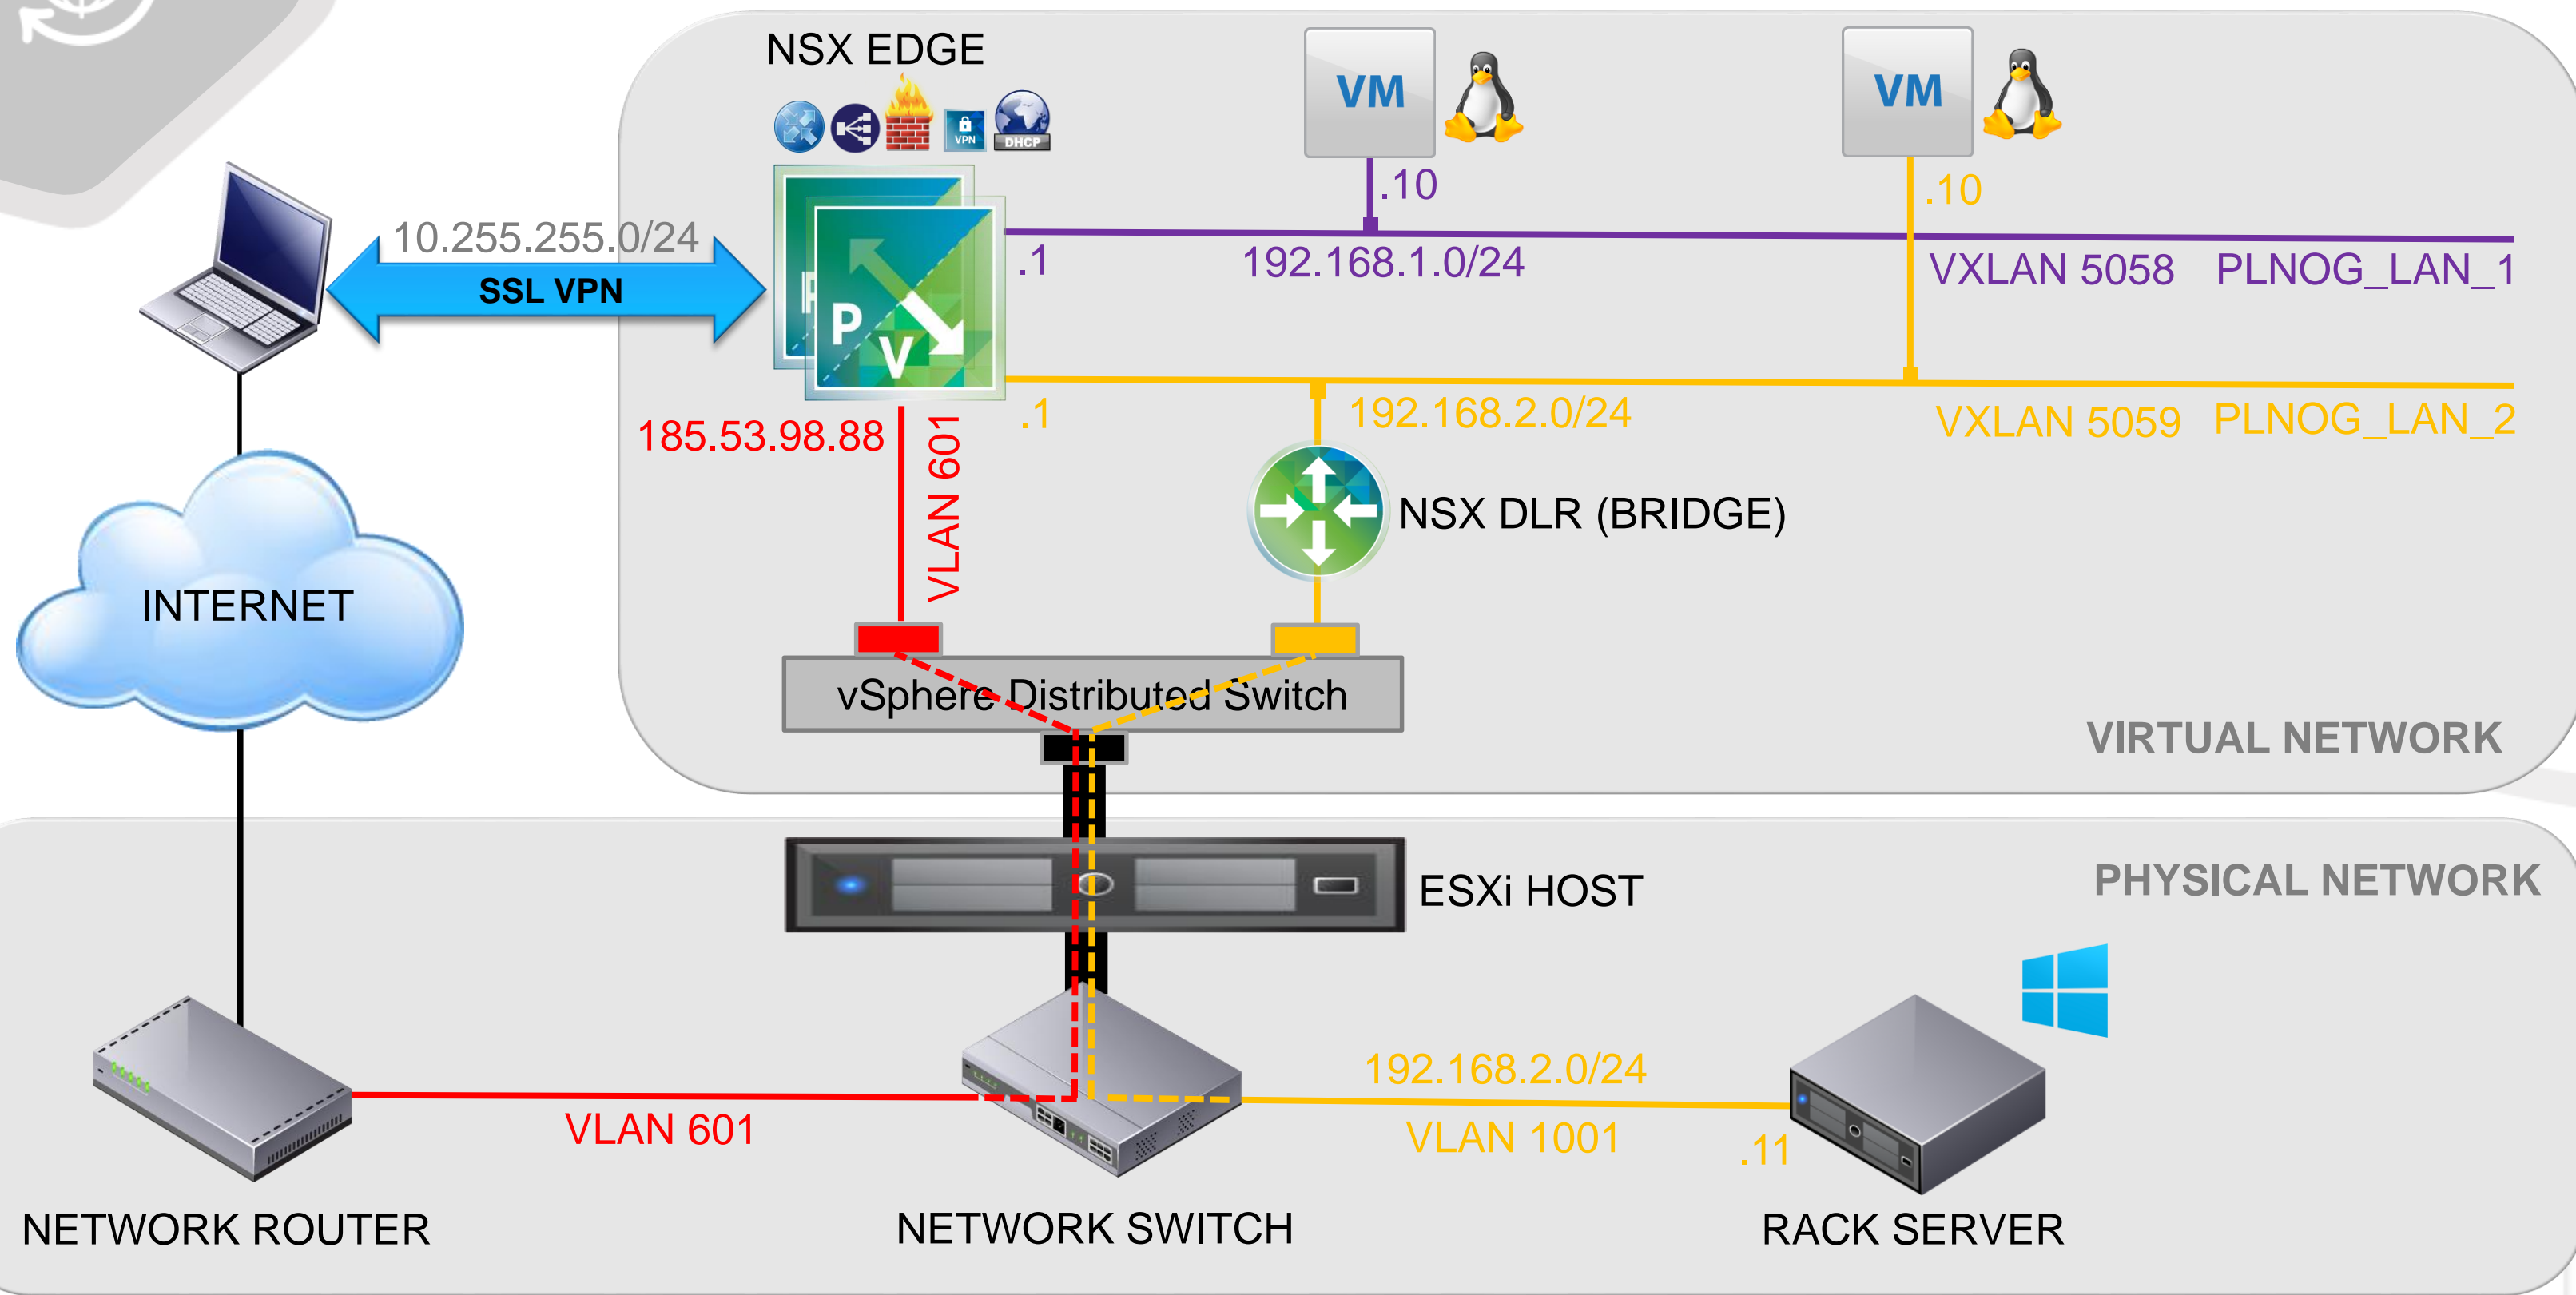

VMware NSX as SDN

- Functionality
- Quick deployment and perfect integration with vSphere
- vCloud Director integration
- Virtual routers, virtual firewalls
- High level of security
- Few „clicks” to secure your cloud

Connecting Virtual and Physical – why not?!

How customer can secure his cloud using NSX

Simple Cloud environment

- 10 virtual servers
- 5 virtual networks
- vApp Functionality
- Web management interface
- Virtual router(s) – Edge gateways

System [redacted] x

Answer - NSX Edge

- DHCP
- NAT/SNAT Rules
- Firewall
- VPN (Site-to-Site IPSec)
- Load Ballancer

Thank you!
